

# YOUR FAVOURITE **KEGGS**<sup>®</sup> TAN ARE HEALTHIER!

**50%**  
More Selenium\*

**50%**  
More Iodine\*

Responding to need for 'Healthier Eggs', KEGGS has repositioned its **KEGGS TAN** variant to yet better serve health-conscious consumers. Our new **KEGGS TAN** Eggs are enriched with Selenium and Iodine, offering enhanced nutritional benefits:

- **Selenium-enriched Benefits:** Selenium is an antioxidant that supports cardiovascular health, immune system function, reproductive health, and may reduce the risk of certain cancer types. While a normal egg contains 20µg of Selenium per 100g, **KEGGS TAN** Eggs provide 37.94µg per 100g—meeting the minimum Recommended Dietary Allowance (RDA).
- **Iodine-enriched Benefits:** Iodine is essential for brain development, thyroid function, and overall health. While a normal egg contains 53µg of Iodine per 100g, **KEGGS TAN** Eggs provide 138.19 µg per 100g—meeting the minimum Recommended Dietary Allowance (RDA).

**CAGE FREE | INFERTILE | BIRD FLU FREE**

\*Lab tested (50% more Selenium and Iodine than Ordinary eggs)

**KEGGS**<sup>®</sup>

Preserving the tradition of great taste!
